

Avetta Analytics 2.0

Get the insights you need to make better decisions

When it comes to ensuring business continuity, decisions need to be made quickly and accurately. Avetta Analytics 2.0 is the robust reporting and analytics engine that drives visibility of Avetta's supply chain sustainability platform. It delivers critical, easy-to-understand insights to address your most urgent questions and make data-driven decisions with confidence.

How it Works

1

Leverage our dashboard library with templated reports, and visualizations built using over a decade of customer feedback.

2

Extend data sets and dive deeper by easily editing existing templates to answer your specific questions.

3

Build your own reports using the intuitive analysis builder with drag and drop functionality.

The Benefits

Better Business Decisions

Detailed reports, intuitive data visualizations, and an at-a-glance KPI dashboard empower you to make data-driven risk management and procurement decisions with confidence.

Self-Service Analytics

Easily build interactive dashboards, where you can filter by unique KPIs to gain instant insights and supply chain confidence. Features also allow you to drill all the way down to record level and perform ad-hoc analysis.

Business Insights

Transform and compare data in a smart, intuitive drag and drop interface. This supports data-driven risk management and procurement decisions. Gain visibility into a variety of workflows.

Improved Performance

What gets measured gets improved. Improve performance with insights to identify, monitor, and address supply chain sustainability gaps.

I work with Avetta because it means you don't spend time collecting data. The work is done for you. You get to review it, you get to pick who you want to use it, and spend your time on more important things.

- **Jessie Brown, Projects Safety Coordinator, Shell Puget Sound Refinery**

The Capabilities

Dashboard Library

With over 50 prebuilt dashboards and charts you can quickly and easily gain visibility into compliance, exception, variance, supply chain and physical security management to support critical business roles.

Intuitive Interface

Build off the value of templated analyses by quickly and easily editing existing reports, visualizations, and dashboards. Extend data sets to get detailed answers to your specific business questions.

Analysis Builder

Build your own analysis from scratch with an easy-to-use analysis builder that puts you in control and gives you the freedom to explore your data on your terms.

Effortlessly Share Insights

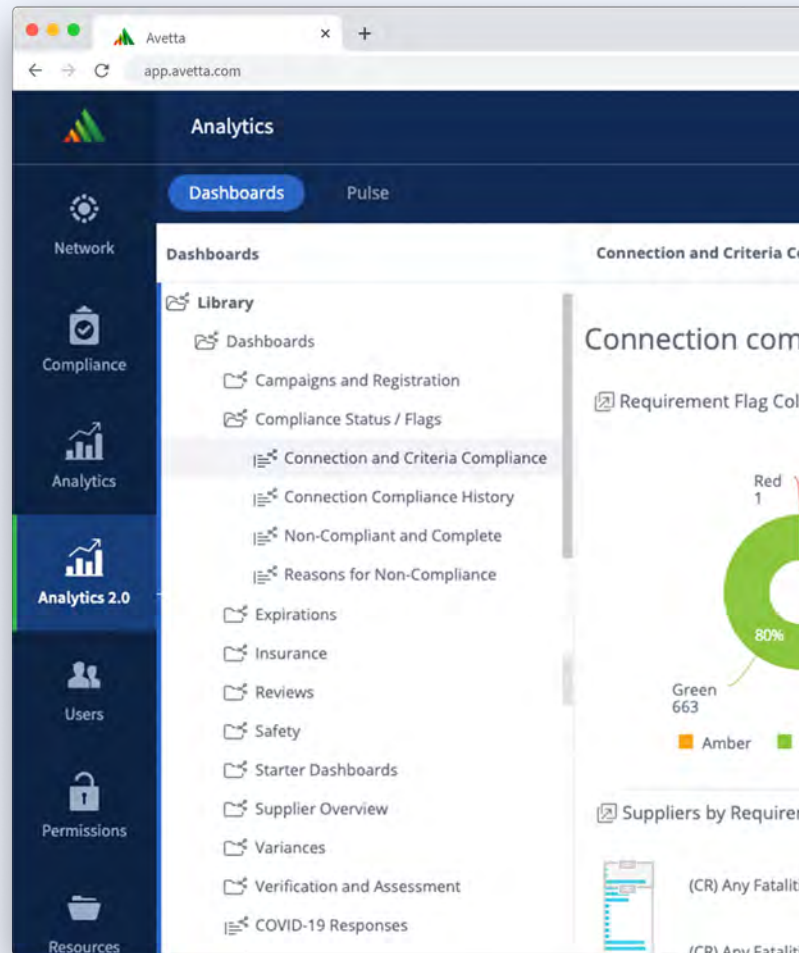

Collaborate and stay up to date on the data with the biggest impact on the organization by sharing dashboards with colleagues and coworkers.

Business Analysts

Need additional help? Avetta's experienced team of analysts provide deep business intelligence expertise. They will help you dig through the data to get the answers you need.

KPI Alerts

Continually monitor KPIs and get alerted when important changes occur.
