

Supplier Assessments

Gain a View of Your Suppliers Beyond Self-Reported Data

Lagging indicators only provide part of the picture and give you false confidence in your supply chain knowledge. To fully manage risk, you need visibility into what suppliers are doing to prevent future incidents. Avetta's Supplier Assessments give you insights from leading indicators helping you to better manage risk and protect your brand.

How it Works

①

Avetta's qualified and experienced safety professionals work with you to determine goals.

②

Avetta reviews suppliers' policies, procedures and training documents. Field observations are also available to site-level visibility.

③

Findings are reported and recommendations for improvement are provided. Suppliers are coached on how to close gaps.

The Benefits

Deeper Visibility

Uncover hidden risk by combining lagging and leading indicators. Guide your company to better decisions with an enhanced picture of supplier risk.

Impartial Evaluations

Preexisting relationships can lead to biased evaluations. Avetta provides objective audits for an accurate view of supplier risk.

Improved Performance

Avetta's assessments are more than simple inspections. If gaps are identified, our qualified and experienced professionals provide guidance for improvement.

Increased Confidence

Forge partnerships with confidence knowing your suppliers have identified, documented and implemented risk-mitigating measures.

Supplier Assessments really simplifies subcontractor management. Even in the field, we can review all subcontractor information, including their safety manual. Avetta provides an easy-to-understand scoring system so we can determine compliance status at a glance. - **Nick Wilkerson, Safety Director, SBA Communications**

The Capabilities

Professional Guidance and Support

Avetta's in-house experienced safety professionals conduct all audits. This gives suppliers a dedicated team to help them meet your standards. With a direct line into experienced auditors, closing gaps is simple and streamlined.

Safety Manual Audits

Have confidence in your supplier's safety standards. Avetta conducts thorough reviews of supplier safety policies and procedures. All findings are presented helping you to better understand the value your suppliers place on safety.

Implementation Audits

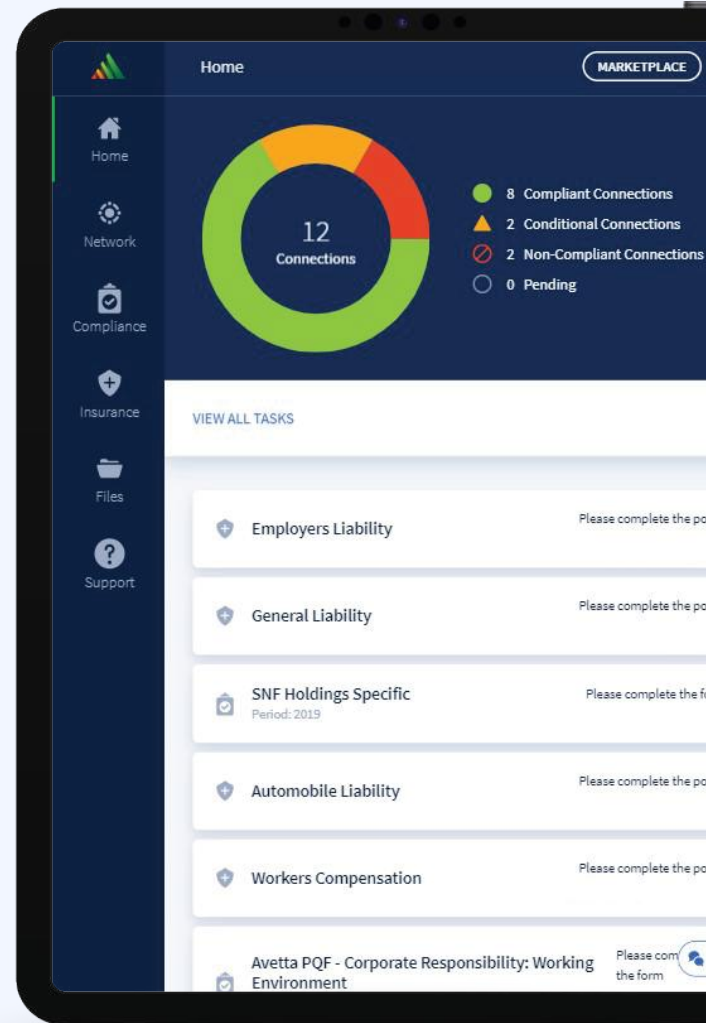

Get the results of a deep dive analysis without having to put in the time, money or energy. Avetta's experienced team evaluates inspection logs, accident investigation forms, maintenance records, training logs and more to verify proper implementation of policies and procedures.

Field Audits

Gain visibility into where areas of opportunity and risk truly lie in your supply chain. Avetta's seasoned professionals visit your sites while suppliers are on the job to verify proper execution in the field. Findings and recommendations are reported – including photographs.

Sustainability Audits

Protect your brand by ensuring your suppliers are held to your economic, environmental and social standards. With Avetta you get a comprehensive review of your suppliers' ability to implement industry sustainability standards, including anti-bribery and corruption initiatives.
