About SBA Communications

Leading independent owner and operator of wireless comms infrastructure across North, Central, and South America

The challenge

With almost 30,000 cell towers globally, many in remote locations, SBA Communications subcontracts repair and upgrade services to a network of almost 2,500 independent contractors. Given the potentially dangerous working environments at the cell tower sites, SBA wanted to make sure its contractors were compliant with government safety regulations and insurance requirements. However, without a central database and search capability for contractor information, checking this data was a time-consuming manual process. “When we needed specific contractor information, such as insurance requirements or proof of OSHA (Occupational Safety and Health Administration) compliance, we had to approach it on a case-by-case basis,” said Nick Wilkerson, Safety Director at SBA Communications.

After a spike in cell tower-related injuries in 2014, SBA wanted a contractor safety and compliance solution. “We didn’t have the staff to go into each contractor’s file and review their safety manual’s content and insurance coverage and make sure they met all of our requirements,” said Wilkerson. “Rather than hire more staff, we decided to look for an easier way to improve safety.”

CHALLENGES

- Make sure 2,500 contractors meet all safety and insurance requirements
- Gain instant access to contractor information when issues arise in the field
- Alert contractors of urgent issues and safety updates proactively

SOLUTIONS

- Supplier Audits
- Supplier Prequalification
- Insurance Monitoring

RESULTS

- Enabled rapid verification of safety and insurance requirements from any location
- Simplified contractor management with web-based platform
- Allowed system-wide alerts for urgent issues, product recalls and more
The Avetta solution

After reviewing solutions from several competing vendors, SBA chose Avetta to provide their cloud-based supply chain qualification solution. “I had been a contractor in the Avetta system before coming to work at SBA, so I was familiar with their solution,” said Wilkerson. “When we learned that Avetta had also worked with Sprint and Motorola, we knew they understood the challenges and issues facing telecom companies.”

After completing a successful proof of concept for SBA, Avetta began to implement the solution, which included Supplier Prequalification, Supplier Audits and Insurance Monitoring, in spring of 2015. Anxious to get all of its contractors in the system, SBA also realized that adoption could be a slow process. They were impressed with how quickly Avetta got its contractors onboard. “Our initial goal was to have 500 contractors in the system by the end of the first year. Instead, Avetta had 1,300 in the system,” said Wilkerson.

Supplier Prequalification’s document management service guarantees fast and accurate collection and verification of contractor data. Avetta’s safety experts collect and verify documentation so the SBA team can direct resources toward growing their business. “Supplier Prequalification is flexible and configurable. We can define our own compliance criteria and quickly see which contractors are qualified, which are not, and why,” said Wilkerson.

SUPPLIER AUDITS

Supplier Audits, Avetta’s world-class auditing service, gives SBA a first-hand view into how their contractors execute documented safety procedures. Auditing services include thorough reviews of employee manuals, training logs and on-site implementation. The solution provides comprehensive reports with written and photographic accounts of positive safety practices, areas for improvement and recommendations. “Supplier Audits really simplifies subcontractor management. Even in the field, we can review all subcontractor information, including their safety manual,” said Wilkerson. “Avetta provides an easy-to-understand scoring system so we can determine compliance status at a glance.”

INSURANCE MONITORING

Insurance Monitoring, Avetta’s insurance verification service, includes an intuitive document management system, automatic alerting and is easily configured for client-specific requirements. SBA’s contractors can easily upload their certificates of insurance to the Insurance Monitoring platform. Then, Avetta insurance specialists review all documentation for SBA thoroughly so the company works with only those contractors that are adequately insured. The solution notifies SBA automatically of changes in a contractor’s insurance status and when their insurance is about to expire. “Every contractor who touches our towers and equipment needs the right coverage and Insurance Monitoring makes it easy to verify that each contractor is insured adequately,” said Wilkerson.
The results

Through Supplier Prequalification, Supplier Audits and Insurance Monitoring, SBA can now verify contractor safety compliance and insurance confidently, giving them significantly improved visibility of contractor accountability. With anytime, anywhere mobile access, both contractors and management can retrieve information from the field.

In addition to saving SBA approximately US$100,000 in employee costs, the solution helps the safety team improve efficiency and be proactive about changing safety measures. “Before working with Avetta, contractor audits or legal issues were time-consuming and often delayed work in the field,” said Wilkerson. “Now, when we have issues with contractor safety information, we can be much more proactive.”

We have a much greater comfort level with our contractors since we started working with Avetta. The Avetta solution is a powerful tool; and, as a leader in our industry, we can use it to make the industry safer.

— Nick Wilkerson, Safety Director, SBA Communications
About Avetta
Avetta connects global organizations with more than 100,000 qualified suppliers, contractors, and vendors across 100+ countries. We support the continued growth of supply chains through trusted contractor prequalification, safety audits, monitoring, and more. With real results in reducing incident rates, our highly configurable solutions elevate safety and sustainability in every workplace.
