

Mitigating Health and Safety Risks with Avetta One

Ensuring that every worker returns home safe everyday

An organisation is only as strong as its network of suppliers. This statement holds particularly true as the global economy marches forward and supply chains evolve in response. This progress, however, brings complexities and new risk factors that organisations need to constantly monitor and mitigate.

Increased exposure to safety risks, mismanagement of the contractor ecosystem, non-compliance with safety regulations, and lack of proper safety controls - all these factors and more can lead to loss of lives, time, productivity, and trust in businesses. Injuries resulting from incidents at the workplace can have devastating consequences. An injured employee may experience severe pain and require medical care. In the worst-case scenario, workplace incidents can lead to fatalities that can have a devastating impact on the victim's family and the community.

A workplace injury or fatality can have severe implications for a company as well. Besides medical reimbursements or legal sanctions, a company may also risk losing its employees and most importantly reputation. Brand damage often has a cascading impact on a company's profits and the long-term effects include increased liquidity risks, diminishing stock prices and reduced market capitalisation.

Health and safety risks don't just affect lives, they can also affect a company's profits

Direct financial costs of workplace injuries exceed \$170 billion annually.

Private industry employers reported 2.7 million nonfatal workplace injuries and illnesses in 2020.

Direct costs of even one workplace safety incident on average is a minimum of \$40,000 – but this is just the tip of a very expensive iceberg, as one must also consider the indirect costs.

Safety costs range from \$47,000 per accident to \$1.2 million per fatality according to the National Safety Council (NSC).

57% of suppliers experienced declining injury rates after joining Avetta.

Avetta One

One Platform. One Solution for End-to-End Supply Chain Health and Safety Risk Mitigation

At Avetta, we understand that every supply chain is unique and comes with a diverse range of risks. This makes creating a holistic compliance framework a necessity for businesses. This is where Avetta One provides answers.

Avetta One is the industry's largest Supply Chain Risk Management (SCRM) platform. The platform is equipped with industry-leading capabilities to assess supplier and worker safety policies, certifications, trainings, and risk maturity across multiple geographies. The platform allows companies to:

Leverage a supplier pre-qualification module to identify safe and compliant suppliers.

Track safety metrics and KPIs including incident rates (Some examples include, Total Recordable Incident Rates (TRIR), Accident Frequency Rate (AFR), Total Recordable Injury Frequency Rate (TRIF). Incident rates are calculated based on region and country specific requirements.

Identify non-compliant suppliers by configuring rules to highlight compliance gaps.

Source safe and sustainable suppliers and deploy suppliers in a safe and efficient way.

Manage and monitor supplier health and safety compliance standards and work with suppliers that are only qualified.

Manage your suppliers' workers – the roles they perform for you, their verifications of competency, their online training and inductions – and be confident the workers on your sites are safe additions to your workforce.

How do We Do It?

Verification Services and Audits

- Avetta employs a large organisation of full-time verification and safety professionals who work to ensure supplier and worker incidents, insurance, certifications, licences and safety policies and procedures are both compliant and valid.
- Suppliers are checked for any past fatalities or if they appear on any sanction lists. Higher-risk and strategic suppliers are assessed against industry, regional and country health and safety standards and regulatory requirements.
- If policies or procedures are found non-compliant, Avetta safety professionals identify these open requirements and ensure suppliers do not perform work until they have proven that they have the appropriate policies in place.
- Avetta's safety professionals also consult and inform the suppliers on how to complete their open requirements and why they are applicable to the type of work they perform and where they perform it. They also provide the suppliers with sample policies and procedures to assist them in meeting the open requirements.

Workforce Management

- Avetta Workforce Management defines, collects and verifies the competencies of workers coming to your site to perform specific work roles, so you can be confident that trained and safe professionals are working for you.
- Worker competency documents are submitted by your Suppliers and reviewed by our in-house team of experts against a rigorous rule-set, to help enforce legislative and organisational standards.
- Create and deliver interactive training and inductions online, or manage classroom (face-to-face) sessions. Training records are immediately visible, providing you with a real-time worker competency profile that can be viewed in the office or the field.
- Access Management technology gives you visibility over who is on your work sites at any time, and includes powerful functionality (e.g. emergency evacuation events) that helps keep workers safe beyond the site gate.
 - Access Control Hardware (e.g. Kiosks, Breathalysers and Boomgates) is available in certain regions (i.e. Australia) only.

Success Story

Sabre Industries

Solutions

Collaborating with Avetta helped the company capture all safety statistics, verify insurance language and limits based on requirements, audit suppliers' processes and safety manual

Benefits experienced

Reduction in TRIR from .96 in 2017 to .71 in 2019, increased supplier count by 130% in 2 years, drop in average lost-workday case rate from .31 to .25, decrease in DART from .49 to .37

Avetta is not just another company we pay; they're an extension of my department in risk management.

About Avetta

The Avetta SaaS platform helps clients manage supply chain risk, and their suppliers, to become more qualified for jobs. For the hiring clients in our network, we offer the world's largest supply chain risk management network to manage supplier safety, sustainability, worker competency and performance. We perform contractor prequalification and worker competency management across major industries, all over the globe, including construction, energy, facilities, high tech, manufacturing, mining and telecoms.

For suppliers in our network, our audit and verification services help lower their safety incidents rate by 29%. As a result, about 50% of members find additional job opportunities within the first year of joining. In addition, our suppliers receive privileged access to the Avetta Marketplace, where dozens of partners offer special discounts for business services like insurance and work gear. Avetta serves more than 500 enterprise companies and over 125,000 suppliers across 120+ countries.
